

DFTU Young Members invites Failures in tunneling – and how to avoid them

DFTU YM have the pleasure to invite all DFTU young members to a presentation on lessons learnt in the tunnel industry, based around case stories from tunnel failures, given by Dr. Alun Thomas.

During the last 25 years, Alun has worked on a wide range of projects worldwide, encompassing many different types of tunnelling. His experience ranges from hand excavation in compressed air on the metro in London to hard rock TBMs in Iceland. He is an active member of several ITA/ITAtch working groups. Alun is currently updating his book on Sprayed Concrete Lined Tunnels and works for his own consultancy, All2plan Consulting ApS.

The presentation will be given 16.00-17.30 on the 29th of January at Ramboll Head Office: Hannemanns Allé 53, 2300 Kbh S.

There will be refreshments during and after the presentation.

Please respond no later than 25th of January to DFTU@dftu.dk
